**A 360° partner
for our clients**

Fondation Alfaset

Since 1962, Fondation Alfaset has been a fundamental player when it comes to outsourcing high-quality services and industrial products. Over 800 professionals (employees in adapted employment and support staff) work for corporate clients who place orders with us.

Entrusting an assignment to Fondation Alfaset also means giving a job to a person in the process of reintegration or someone living with a disability. Beyond personal challenges, whether temporary or long-lasting, everyone working with us is competent, motivated, trained in their field and benefits from an adapted professional environment.

production+services

A 360° partner for our clients

Fondation Alfaset is a trusted partner in the industrial, retail and service sectors.

Would you like to outsource a task? Even at short notice?

building maintenance service

conference room & and catering service

production

manual operations – various

Some operations need to be carried out by hand and with care, whether for small quantities or large volumes.

Our teams can be gathered quickly, sometimes on several sites at the same time.

We check, sort, pack, label, fold, fix and assemble the items you entrust to us.

When you work with us:

You can have your supplier's components delivered directly to us, as well as sending items to your clients from our workshops.

Examples of orders

- Gift set assembly
- Batch manufacturing
- Re-labelling
- Bagging
- Posting
- Repairing defects
- Folding
- Counting
- Document insertion
- Quality control
- Watch case assembly

production

watchmaking subcontractor

With the benefit of being close by, our long-standing collaborations with watch manufacturers and brands have enabled us to create a dedicated workshop.

We know watch components, we master precision work, and we meet high expectations when it comes to execution. Our team is experienced and particularly reliable.

Our watch component packaging using blister packs with anti-corrosion protection, for storage and delivery worldwide, is ideal for after-sales service and sending protected parts.

Examples of orders

- Bracelet buckle assembly
- Product listing support
- Bagging precision parts
- Packaging after-sales service parts
- Blister packaging
- Calotte fitting
- Nitrogen packaging

When you work with us:

We carry out operations that meet your standards.

production

industrial sheet metal work – locksmithing

Whether for machine frames or locksmithing projects, our workshop offers sheet metal services, large-format laser cutting, welding and powder coating for the production of custom-made components.

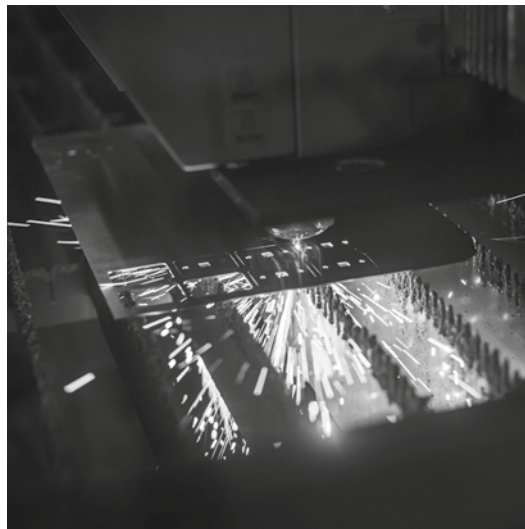

From series production to custom builds, our industrial sheet metal work and locksmithing workshop can be adapted to every client request. From sheet metal to aluminium, steel and stainless steel, get in touch with us for your next industrial project!

Examples of orders

- CFF newspaper boxes
- Machine tool frames
- Machine hoods

When you work with us:

Benefit from our laser cutting machine for all types of metal.

production

powder coating

Metal structures are made durable through the right preparation and treatment. Whether sandblasted, phosphated or powder-coated at 200°C, our robust finishes stand the test of time.

We carry out the work with the finish, shade and appearance of your choice.

When you work with us:

We can offer rust protection as well as the RAL colour on request.

Examples of orders

- Furniture
- Machine frames
- Protective covers
- Anti-corrosion treatment
- Degreasing and phosphating

production printing

We offer a comprehensive range of digital and offset printing for professional or personal documents.

Our team of experts will guide you towards the best solutions for your conventional or bespoke printing needs, as well as the most appropriate technology. Come and discover some of our special features, such as four-colour process or Pantone printing for technical manuals or medical leaflets.

Technical services:

Advice on adapting your personal projects

Pre-press services:

Advice, pre-press checks, and page layout

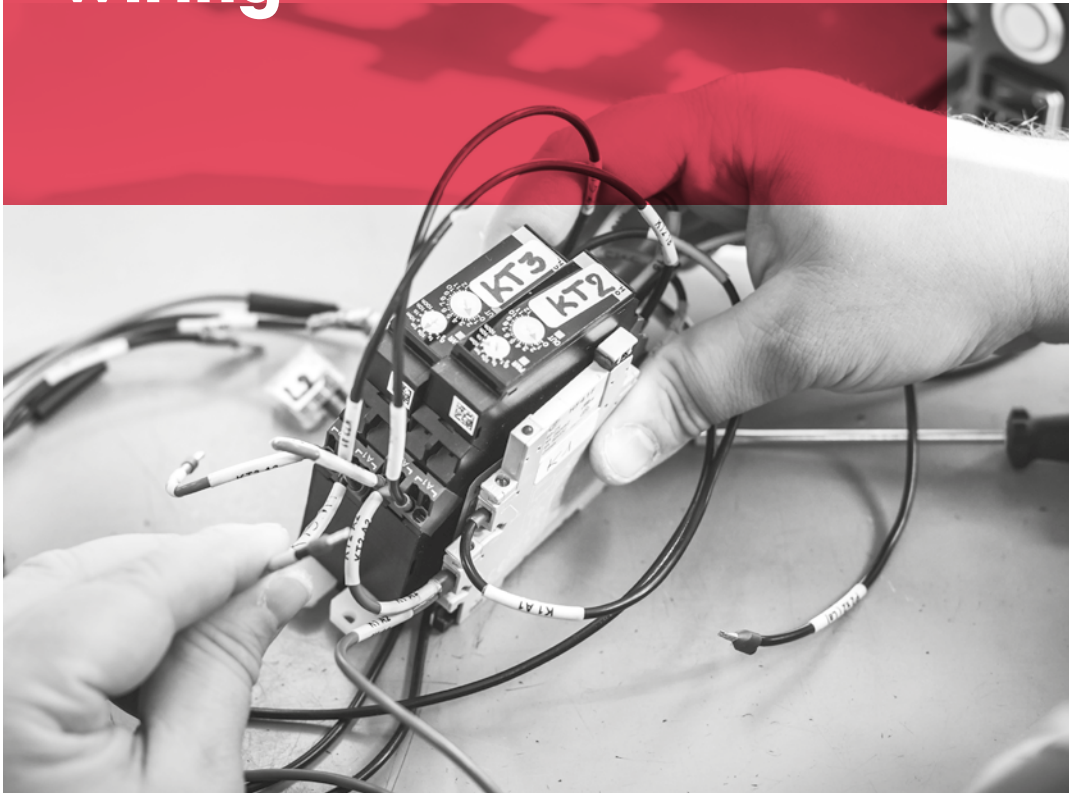

Examples of orders

- Mail campaigns
- Company brochures
- Posters and flyers
- Leaflets
- Books
- Technical leaflets
- Annual reports
- Letterheads
- Envelopes
- Business cards
- Paperwork
- Certificates, diplomas and degrees

When you work with us:

You can also access customised binding and finishing services when you visit us.

production wiring

Electricity and power supply are governed by strict standards, and their application requires specialist expertise.

We prepare cables, label them, inspect and integrate them, as well as creating bespoke electronic assemblies. We also print or affix reference markings on cables and wires.

Our service is sought both for testing and fabrication or reworking. Our client base comes from diverse sectors, including IT, machine tools, MedTech and more.

You can find electronics in all types of products, so contact us for your next project

Examples of orders

- Assembly of electrical boxes
- Crimping / Tinning
- Made-to-measure cables
- Preparing electrical wire kits
- Testing
- Compliance checks
- Assembly
- Lighting fixtures

When you work with us:

We can offer prototyping for startups.

production

plastic injection moulding

Designed for the production of medium to large series parts, plastic injection moulding allows you to manufacture anything from simple to complex shapes in various sizes using your own moulds.

Examples of orders

- Various components
- Boxes
- Protective parts
- Medium- to large-format parts

Our expertise originates from experience in producing orthopaedic prostheses, and has since expanded into the industrial and watchmaking sectors. We are proficient in working with the different materials available for this production technique and serve as subcontractors for the plastic injection industry.

Already have the moulds? We can produce your parts and carry out deburring, inspection, sorting and packaging. Injection can also be performed in a semi-automatic cycle with an operator.

When you work with us:

We can handle a wide range of thermoplastics and elastomers.

production machinery

Our extensive experience in industrial mechanics, together with our machinery fleet, has made the workshop a trusted subcontractor for machining and manufacturing projects.

Examples of orders

- CNC milling
- CNC turning
- Drilling
- Specialist shaping

From finished or semi-finished parts to partial operations, we can meet your short- and long-term needs and help deliver high-performance industrial equipment.

When you work with us:

We can collaborate synergistically with other workshops, such as our sheet metal work/locksmithing and wiring services.

production

carpentry

For small or large production runs, our carpentry workshop creates a wide variety of products in all shapes and sizes for institutional, industrial and private clients.

With 5-axis CNC machining, presses, lacquering and customisation, woodwork offers endless possibilities. Our clients place orders for items that are practical, technical, aesthetic, durable – or all of the above.

Examples of orders

- Magnetic pencils
- Customised wine boxes
- Small pieces of furniture
- Watchmakers' workbenches
- Trays
- Wooden games
- Beehives
- Insect hotels
- General joinery

When you work with us:

You experience professional, 100% local manufacturing. We use local wood wherever possible.

production

integrated workshops

Would you like to dedicate an entire Fondation Alfaset workshop to your production? With our integrated workshop model, you can. Whether on your premises or ours, our team of operators and support staff remains fully managed by us.

From packaging and inspection to assembly and cleaning parts, we can develop a bespoke service tailored to the needs of interested companies.

Existing partnerships

- Felco
- Nivarox
- Philip Morris
- Von Bergen
- Horotec

When you work with us:

Benefit from the skills and talents of our beneficiaries while actively contributing to their social and professional integration.

production

orthopaedic products workshop

Fondation Alfaset manufactures orthopaedic prostheses and orthoses at an excellent quality-to-price ratio, aimed at serving the world's most vulnerable populations.

Examples of orders

- Prostheses
- Orthoses
- Orthopaedic equipment

The International Committee of the Red Cross is a client of Fondation Alfaset's orthopaedic workshops. The Rehab'Impulse brand, owned by the ICRC, is operated by Fondation Alfaset.

Various NGOs and international institutions also source directly from Alfaset, benefitting from our renowned specialist knowledge.

When you work with us:

We can also produce modular components.

services

office services

Our office services workshop handles a wide range of administrative tasks, from sorting and data entry to the creation of documents.

Whether using the latest digital tools or working on paper, the workshop can take on virtually any task that would typically be managed by an in-house administrative team. Responsibilities also include order confirmations and the management of Fondation Alfaset's online shop.

Examples of orders

- Filing
- Sorting physical or digital documents
- Transcribing statistics
- Data entry
- Creating databases
- Document formatting
- Identifying references
- Updating terms and conditions

When you work with us:

We can collaborate with other Fondation workshops for fully integrated projects.

services

digital archiving

Documents previously stored on paper can be made easily accessible through the professional digital archiving service offered by Fondation Alfaset.

Newspapers, invoices, various paper records – everything can be delivered in PDF format, enabling a smooth transition to electronic document management. We handle both small and large volumes with the same level of care.

Examples of orders

- Newspapers
- Invoices
- Books
- Posters
- Booklets
- Medical records

When you work with us:

We scan with indexing.

services

industrial laundry

Our professional laundry service is designed for restaurants, hospitals, care homes and other institutions with high expectations in terms of quality, traceability and hygiene standards.

Offering maximum safety, our industrial laundry processes comply with the RABC method (Risk Analysis and Biocontamination Control), ensuring optimal management of the laundry cycle. Textile cleaning plays a central role in health and hygiene, and industrial laundry services are a key part of that system.

Examples of orders

- All types of linen
- Washing
- Stain removal
- Ironing
- Calendering
- Custom labelling

When you work with us:

An RFID chip is integrated into your laundry, including cleaning, ownership and traceability data.

services

building maintenance service

Maintenance and upkeep of the various buildings at Fondation Alfaset are carried out in-house by our specialised service.

This service primarily meets the Fondation's needs, handling the surrounding area, cleaning, small repairs and modifications. External requests may also be considered.

Examples of orders

- Cleaning the Fondation's building
- Lawn mowing
- Snow removal
- Recycling materials
- Setting up the conference room and event catering facilities
- Maintenance of the therapy pool

When you work with us:

Supplies for rooms in the residential sector

services

conference room & catering service

We can organise seminars and corporate events, with or without on-site catering.

A bright, modular room with professional equipment is available for rent, accommodating up to 99 people depending on the chosen layout. The head chef and their team offer catering services, making the event a celebratory, personalised experience.

Examples of orders

- Training courses
- Jubilees
- Conferences
- General meetings
- Buffets
- Table service

When you work with us:

You are guaranteed optimised acoustics and a system equipped with a loop for the hearing impaired.
